If I have a method such as below and I also have the base R (or any other more modern R methods), is it still necessary to run the within() function (as I can do it with standard R)? myFunc

What's New in the?

Expand your screen to take in the whole page in your drawings. Markups and annotations appear in context on one screen. (video: 1:15 min.) Refresh and expand your drawing when you switch to the next page. With a single click, the next page of your drawing shows up, and your annotations and marks remain. (video: 1:15 min.) Highlight a specific point or block with a single mouse click and create annotations around it automatically. You can now make annotations in any direction and even outside a drawing window. (video: 1:15 min.) Seamlessly view and annotate 2D drawings. In addition to digital drawings, you can now view and annotate multiple source drawings at the same time. (video: 1:15 min.) Import workflows: Allow your drawings to speak for themselves. Send imports from other CAD software directly into AutoCAD. Drawings and annotated blocks appear in a mobile, annotated import format. (video: 1:15 min.) Receive updates and bug fixes without restarting AutoCAD. Autodesk releases updates directly to drawings in the cloud, without requiring a restart of AutoCAD. When you open a drawing on a new computer, it retrieves any new or modified changes and displays them on the computer automatically. (video: 1:15 min.) Get a heads-up on changes to your drawings. Quickly see the changes or comments you've made to a drawing. New versions of the drawing can be pushed to your computer automatically. Any changes you make are instantly reflected in the changes made in the drawing. (video: 1:15 min.) Insert an image into a drawing with a single click. Many of your graphic applications now store an image in a drawing. Just drag the file to the drawing and it appears. The image is directly linked to the drawing to enable you to insert the image into a drawing. (video: 1:15 min.) Use images instead of paper clips. Add images to a drawing to represent products, items, or other reference information. They make your drawings look like a catalog. (video: 1:15 min.) Store your drawing in the cloud. Save your drawings in the cloud. Design and build your drawings and files in the cloud. Access and work on them from any computer. (video: 1:15 min.)
